- Key  
Nickel silver with plastic handpiece
- Wing knob / T-handle  
Plastic (Polyamide PA)  
Black, matte finish
- *Plastic Characteristics* → Page 2158
- **RoHS**

**On request**

- Hook-type latches with other hook distance A
- Hook with other pivoting radius R

**Information**

Hook-type latches GN 115.8 with hook and latch bracket are mainly used for sliding doors and flaps. The locking action is in radial direction to the axis of rotation, resulting in a wide variety of different uses.

The latches are delivered with 2 keys and loosely enclosed hook. The key can be removed in both end positions.

Types with a standard lock allow every lock to be opened with the same key. For the types with different lock, there are more than 200 different lock variants, whose keys are marked by numbers.
