Specification

1

4

- Stainless steel AISI 304 **NI**
Matte finish, ground **MT**
- Threaded studs
Stainless steel AISI 304
Pressed-in
- [Stainless Steel Characteristics](#) → Page 2166
- RoHS**

On request

- Other threaded stud lengths
- Other plate sizes
- Other plate geometries

Information

Plates GN 2376 are designed as accessories for multiple families of hinges. They make additional threaded holes, bolts, nuts and washers unnecessary during installation. This eliminates the labor-intensive pre-installation of such parts as well as the need to hold them in place during tightening or loosening.

The plates are fastened from the outside via through-holes in the housing wall or alternatively by welding to the inside of the wall. This results in effective protection against vandalism, and the outsides of the housing remain free of attachments that do not match the design or that should be avoided entirely in the interests of easy cleaning.
