Folding handles numbers 1 and 2 are suitable for side "access," as these have a 90° limit stop. If used from above, numbers 3 and 4 with a handle which can fold freely through 180° are a better version.

The retaining springs of numbers 2 and 4 keep the handle in any position. This keeps the handle in a position which can be easily accessed and prevents noise as a result of vibration in the resting position.

The handle and the retaining springs are secured by mounting the attachment across the entire surface. All components are supplied unassembled.

GN 425.8 Folding Handles with Hecessed Iray (Steel / Stainless Steel, with Handle Locking or Spring-Loaded Return)
