Specification

Magnet
NdFeB
Neodymium iron boron
Operating temperature up to 180° C

Housing
Stainless steel AISI 316L
Matte finish (Ra < 0.8 µm) **MT**

Sealing ring
- H-NBR **H**
  Operating temperature -25 °C to +150 °C
- EPDM **E**
  Operating temperature -40 °C to +120 °C
- FKM **F**
  Operating temperature -5 °C to +200 °C
- FDA compliant material
- Blue
- Hardness 85 ±5 Shore A

RoHS

Retaining magnets GN 5080 are designed for use in hygienic areas. The sealed screw-on surface enables mounting without dead spaces, the impervious geometry in combination with the high quality finish prevents dirt from accumulating and facilitates cleaning.
Since non-magnetic stainless steels are generally used in hygienic areas, a holding force is only achieved in combination with holding disks GN 7080 or GN 7090. If an increased holding force is required, a second magnet with opposite polarity can be used as a counterpart.
Thanks to the material used and the enclosed design, the retaining magnets can also be used in particularly aggressive environments.
