Original design RLT- HJ/HE

Type

- C Connector
- E End cap

Specification

- Plastic
Polyamide (PA)
- Black
- Temperature resistant up to 90 °C
- Pan-head screws
Stainless steel
- *Plastic Characteristics* → Page 2158
- RoHS

Information

Connectors GN 646.6 (Type C) can be used to create longer carrier profile extensions. Assembled with two screws at each profile end, the carrier profiles are interconnected without any further fastening hardware as shown in the drawing. The connecting point cannot carry any weight and must be supported from underneath.

End caps (Type E) are the preferred end finishing components for roller track or ball rail assemblies. They also cover the sharp edges of the carrier rail profiles, to create a clean, safe and finished look.

Two slotted pan-head screws ISO7049-ST2 9x13 for mounting the connectors and the end caps are included.
