Self-tapping screws ISO 7049	
Steel, zinc plated ST 3,5-20	
RoHS	

The design of the GN 739 gripping trays matches the product family of Ergostyle®. These gripping trays are means for opening and closing sliding doors.

The installation opening for the gripping tray must be created according to the dimensions given in the table.

For mounting, the front body is first inserted into the opening of the housing and then the rear body is pushed up from behind to the housing wall. Finally, both parts are screwed together.
